# IN BOX™ Weatherproof-in-use, Recessed Electrical Box for NEW Rigid Siding

**For NEW RIGID siding** One-piece, recessed electrical box with weatherproof-in-use cover for new cementitious or fiber rigid lap siding (also for stucco or textured surfaces). Non-metallic cover and base. Accepts most single-gang wiring devices and uses standard indoor wall plates or a GFCI cover plate. Box and white cover are textured/ paintable. UV-rated plastic for long outdoor life.

- One-piece assembly replaces the installation of an electrical box and bubble cover assembly
- Installs in the wall, so less of it shows outside
- Install option: Cover is removable for easier device installation

**Note:** Meets 2008 NEC Section 406-8; for the protection of exterior outlets which require the use of a weatherproof while-in-use cover for all outdoor 15 or 20 AMP receptacles.

**IN BOX for NEW rigid siding includes...**  
Box with weatherproof-in-use cover, installed bug plugs, (1) standard duplex and (1) standard GFCI face plate, (1) NM cable connector, block bushing with washer, and an in-place disposable mud cover.

**Also for stucco or textured surfaces in new construction...**

Make a 3-1/4" x 5-1/2" hole in block. Pull wiring through plastic block bushing and opening in block. Block bushing mounts to interior side of block.

Install NM cable connector and wire. Attach recessed IN BOX to block. Holes in flange allow stucco to bond firmly.

Install wiring device per manufacturer's instructions, and local and National Electrical Codes.

IN BOX and plastic block bushing mounted in concrete block

## Installation of 8081F, 8081FDBL, 8082F, and 8091F with Flange

Insert provided NM cable connector through the knockout of your choice and push the wire through.

Before siding is installed, using the 'flanged' style, screw the box to the wall using the holes provided in the flange.

Install siding around box section and caulk as required.

Attach the cover (8081F shown).

Connect the wires and install the fixture.

An electrical box and cover, all-in-one!

Siding block cover is placed over the electrical box.

The rectangular hole provides access to the wire connections.

For installation **BEFORE** siding is installed

## Installation of 8081 and 8081DBL without Flange

For installation **AFTER** siding is installed

**1**

Place box section in desired location and pencil outline onto siding.

**2**

Cut along pencil line with razor knife and remove vinyl siding.

**3**

Mount box section to substrate. Caulk as required.

**4**

Place siding block over box section (8081 shown).

**5**

Connect wires and install fixture.

**or**

Install a duplex receptacle!

# One-Piece Fixture Box Patented

For installation  
**BEFORE or AFTER**  
siding is installed

Arlington's one-piece fixture box is the easiest way to install light fixtures and receptacles on siding.

Its one-piece construction offers easy installation, and there's no cover to lose or store.

8141F provides smooth vertical mounting of light fixtures on *all* siding types—*before or after* the siding goes up.

## 8141F Costs 20% Less than 8081F!

- For light fixtures
- One-Piece design
- For use with All Siding Types
- UL/CSA Listed
- With flange, use for mounting before the siding is installed...with flange removed, can be used after the siding installation!
- Made of high impact, UV-rated plastic for long outdoor life
- Textured, paintable finish
- NM cable connector included

## 8141F Installation

### Before siding is up...

- 1 Remove knockout from 8141F. Insert cable connector. Push NM cable through connector.
- 2 Attach mounting block to substrate with (2) screws.
- 3 Install fixture according to manufacturer's instructions.
- 4 Caulk as required.

### After siding is up...

- 1 Cut hole in siding.
- 2 Break flanges off the back of the 8141F. Remove knockout. Insert cable connector in KO, then push NM cable through connector.
- 3 Attach mounting block to substrate with (2) screws.
- 4 Install fixture according to manufacturer's instructions.
- 5 Caulk as required.

# Siding Box Kit with MEGA Mounting Plate!

## 8091FDBL Installation

Oversized 7-1/8" x 13-1/2" Mounting Plate gives rigid support to large coach lamps.

Extra Deep 24.5 cubic inch UL Listed box - for fixtures with transformers under the base.

- 1** Insert provided NM cable connector through the knockout of your choice and push the wires through.
- 2** Box section mounts to substrate. Caulk as required.
- 3** Place MEGA block plate over box section.
- 4** Install fixture.

## Mount the Largest Coach Lamps with 8091FDBL!

Use 'Down' or 'Up' to fit any mounting hole configuration.

### 8091FDBL

Notched on back for removal of outside flange for retrofit work.

For installation  
**BEFORE or AFTER**  
siding is installed

Mount coach lamps that are too big for smaller mounting plates with 8091FDBL. It has the *largest* mounting plate available and an *extra deep* electrical box.

The box and cover are made of UV-rated plastic and can be painted to accommodate any color scheme.

- **Sturdy mounting surface provides a solid mount for large fixtures.**
- **Provides a UL Listed installation.**
- **For use with All Siding Types.**
- **With flange, use for mounting before the siding is installed...with flange removed, can be used after the siding installation!**
- **Kit includes a NM cable connector.**
- **Cover may be rotated 180° to accommodate fixtures with mounting holes above or below center line.**

Catalog Number	UPC/DCI/NAED MFG #01 8997	Description	Unit Pkg	Standard Pkg

For All Siding Types				

## Siding Mounting Kits with Built-in Box Patented

Arlington offers a *complete* Siding Mounting Kit for smooth, vertical mounting of lighting fixtures on *all* siding types!

Made of UV-rated plastic for long, outdoor life, the textured surface is paintable to match the mounting surface.

The *built-in* electrical box design ensures a UL Listed installation every time.

For installation  
**AFTER**  
siding is installed

For Installing Light Fixtures Vertical on Sided Structures.

Determine your Siding Type, to Select the Proper Kit...1/4" & 5/16", 1/2", 5/8", or Dutch Lap Siding!

Each kit includes:  
Mounting Block with Built-in Electrical Box,  
NM Cable Connector and 4 Screws.

**Arlington**

## 8131, 8141, 8151, and 8171 Siding Installation

**1** Select location for light fixture and caulk opening around cable.

**2** Remove knockout from electrical box and insert cable connector. Push cable through connector and position mounting block onto siding.

**3** Secure mounting block with provided screws. Install fixture.

**Easily converts to an Oversized fixture see MEGA Siding Plate on page 13!**

8141DBL

# Siding Mounting Kit with Built-in Box for installing light fixtures on FLAT Surfaces!

## 8161 Flat Surface Installation

- 1 Select location for light fixture and caulk opening around cable. Remove KO, insert cable connector, push cable through and position block on surface.

- 2 Secure mounting block with provided screws and apply paint to textured block to match wall surface.

- 3 Secure mounting block with provided screws. Install fixture.

## 8161...Installs Light Fixtures Vertically on Any FLAT Surface!

Catalog Number	UPC/DCI/NAED MFG #01 8997	Siding Type	Std Pkg	Dim A*	Dim B*	Dim C*
8161	08161	Flat Surfaces	10	4" Diameter x 1/2" Deep	6.625"	6.625"

# MEGA Siding Plates...the Largest Mounting Covers in the Industry!

For use with Arlington's Siding Blocks and Boxes...

- 8131   ■ 8141   ■ 8151
  - 8161   ■ 8171   ■ 8082F   ■ 8091F\*
- \* for 8100MLP only

And most other manufacturers' mounting blocks.

## MEGA Siding Plate installation

- 1 Remove existing light fixture and mounting bracket.
- 2 Determine the mounting location for new fixture on mounting plate.
- 3 Place the 8100LP MEGA Siding Plate over the fixture mounting screws.
- 4 Install the new, large light fixture.

## SUPER MEGA Siding Plate installation

- 1 Use with an existing mounting block.
- 2 Disconnect electrical power. Align slots and secure the 8100MLP to the siding block.
- 3 Install extra large fixture per manufacturer's instructions.
- 4 If screw holes are offset, simply rotate the 8100MLP 180°.

Support large fixtures or coach lamps the easy way by converting the standard size cover to a MEGA or SUPER MEGA cover.

There's no need to remove the octagonal block you've already installed. The MEGA mounting plate fits right over the existing block.

For installation **AFTER** siding is installed

### 8100LP

May be rotated 180° to accommodate fixtures with off-center mounting.

### 8100MLP

May be rotated 180° to accommodate fixtures with off-center mounting.

- Accommodates light fixtures with mounting brackets up to 12"
- Provides a smooth, secure mounting surface for large fixtures
- Instantly converts a previously installed octagonal siding block to a MEGA siding plate
- Adjusts up to 1" for offset mountings
- Features alignment mounting slots to guarantee the MEGA Siding Plate will stay securely in position
- Made of UV-rated, paintable plastic

Catalog Number	UPC/DCI/NAED MFG #01 8997	Description	Unit Pkg	Standard Pkg
8100LP	10749	MEGA Siding Plate 7-1/8" x 13-1/2"	1	10
8100MLP	10752	SUPER MEGA Siding Plate 8-1/2" x 16"	1	10

Patented / Other patents pending.

## Fixture Boxes with Threaded Openings

8161TR for Flat Surfaces

Install a fixture now, anywhere you want it – add another fixture later. It's easy with Arlington's non-metallic fixture boxes with threaded openings.

### Saves Time. Convenient!

This box installs in either the horizontal or vertical orientation, and gives you the option of installing your fixture where you need it. You can also install additional security or flood lights at a later time through the threaded openings.

Convenient and versatile, 8161TR is designed for flat surfaces. We also have an adapter plate for each siding type that allows this box to be used on all siding types (see pages 18-19 for outlet boxes with threaded openings).

- **Non-metallic**
- **Includes two threaded openings**
- **Installs fixtures on flat, exterior surfaces**
- **UV-rated**
- **Textured, paintable finish**

8161TR  
fixture box  
for flat  
surfaces

## Add another Fixture or Outlet, the EASY way!

### 8161TR Installation

**1** Pull wire. Attach box to flat surface.

**2** Install fixture.

**3** Use threaded opening(s) and PVC conduit...

**4** to install additional fixture(s).

Catalog Number	UPC/DCI/NAED MFG #01 8997	Siding Type	Unit Pkg	Standard Pkg
8161TR	00878	Flat Surfaces	10	10

Includes NM cable connector, (4) screws, (2) 1/2" NPT plugs

## 8131TR, 8141TR, 8151TR, 8171TR for Siding

We designed an adapter plate that converts the 8161TR box for flat surfaces into a fixture box that can be used on any siding type.

- Non-metallic
- Includes two threaded openings
- Install fixtures on any siding type
- UV-rated
- Textured, paintable finish

An adapter plate converts the flat style for use on any siding type

### 8171TR Installation

**1** Pull wire. Attach box to siding surface. Install fixture.

**2** Use threaded opening(s) and PVC conduit...to install additional fixture(s).

Catalog Number	UPC/DCI/NAED MFG #01 8997	Siding Type	Unit Pkg	Standard Pkg
8131TR	00875	Rigid 1/4" or 5/16"	10	10

8171TR	00879	Dutch Lap	10	10

Includes NM cable connector, (4) screws, (2) 1/2" NPT plugs

## Mounting Bases for Meters and other Products

For installation  
**BEFORE**  
siding is installed

Arlington's one-piece, non-metallic Mounting Bases provide a secure, flat mounting surface for even the largest electric meters.

Redesigned for even easier use, the squared-off corners allow the bases to be butted together for gang installations!

They install before or after the siding goes up, work with any siding type, and accommodate almost all meter sizes! They're UV-rated for long outdoor life and paintable to match any color scheme.

- Provides a flat mounting surface
- UV-rated for long outdoor use
- Textured, paintable surface
- One-piece, non-metallic
- Provides a 1" overhang to cover cut ends of siding
- Gangable to accommodate most meters and other products

**Arlington**

### MM18, MM23 meter mounting bases

**Support even the largest electric meters**

### MM10 mounting block

**Mounts a variety of products on siding — fast!**

- Disconnects
- Keypads
- Timers
- Telephone Boxes
- Cable TV Boxes

Our 7" x 10" one-piece Mounting Blocks mount a variety of products simply and securely on siding. The block's overhang hides cut ends of siding for a clean, attractive installation.

*See chart on next page to select the product matching your specific installation condition.*

## MM10, MM18, and MM23 Installation

- 1** Fasten to substrate through 'notched flanges'.
- 2** Siding butts to Meter Base, overlapping the 'notched flanges'.
- 3** Meter Base mounting surface provides a 1" overhang to hide cut ends of siding.
- 4** And you're ready to mount the meter.
- 5** Caulk as required.

### Mounting options

Rotate all illustrated combinations 90° for additional surface mounting options.

Catalog Number	UPC/DCI/NAED MFG #01 8997	Description	Unit Pkg	Standard Pkg
<b>MM10</b>	42278	Meter Mounting Block 7" x 10"	10	10
<b>MM18</b>	42280	Meter Mounting Base 17-5/8" x 15-7/8"	10	10
<b>MM23</b>	42282	Meter Mounting Base 23" x 17-5/8"	10	10

For All Siding Types

### Gangable Meter Base combinations

Seal all vertical joint channels with Arlington's DSC1 Duct Sealing Compound

**NEW**

## Outlet Box with Threaded Openings

FS8161T for Flat Surface

Install a receptacle where you need it; add another outlet box later. It's easy with Arlington's non-metallic threaded-opening outlet boxes.

### Saves Time. Convenient!

The FS8161T box gives you the option of installing the receptacle where you need it – in horizontal or vertical orientation. The threaded openings allow for the installation of additional outlet boxes at a later time.

Convenient and versatile, FS8161T is designed for flat surfaces. We also have an adapter plate for each siding type that converts the FS8161T box for use on all siding types.

- Non-metallic
- Includes two threaded openings
- Installs devices on flat, exterior surfaces
- UV-rated
- Textured, paintable finish

Shown with Arlington's 60VW IN and OUT™ Cover (sold separately)

Patent pending

FS8161T outlet box for flat surfaces

**Add another Outlet, the EASY way!**

### FS8161T Installation

**1** Pull wire. Attach box to flat surface.

**2** Install receptacle.

**3** Use threaded opening(s) and PVC conduit to install additional outlet boxes.

Catalog Number	UPC/DCI/NAED MFG #01 8997	Siding Type	Unit Pkg	Standard Pkg
FS8161T	00873	Flat	10	10

Includes (2) 1/2" NPT plugs

## FS8131T, FS8141T, FS8151T, FS8171T Outlet Boxes with Threaded Openings for Siding

We offer an adapter plate that converts the FS8161T box for flat surfaces into an outlet box that can be used on any siding type.

- Non-metallic
- Includes two threaded openings
- Install devices on any siding type
- Horizontal or vertical installation
- UV-rated
- Textured, paintable finish

### FS8171T Installation

**1** Pull wire. Attach the appropriate adapter to the FS8161T box and install on siding.

**2** Install receptacle.

**3** Use the threaded openings to add another Outlet Box.

**Use the threaded openings to add another Outlet Box!**

FS8171T	00874	Dutch Lap	10	10

Includes (2) 1/2" NPT plugs

## Weatherproof Outlet Box and FS Boxes

For installation  
**BEFORE or AFTER**  
siding is installed

For fast and easy vertical or horizontal installation of devices in dry locations, FS8091F is your best buy for areas that don't require a weatherproof while in use cover.

Although FS8091F can be used with a bubble cover for wet locations as required by the NEC, our IN BOX™ (DBVS1C or W) on page 22 costs less than the combined cost of the outlet box and a bubble cover – and looks a whole lot better!

FS8091F

- For all siding types
- Installs before or after siding
- Works with all single-gang, devices including GFCIs

Outlet Box for single-gang devices, including GFCIs!

FS8091F

Add a weatherproof- in-use cover to meet code in wet locations.

To save money on the total cost of the box and cover – and get a great looking job too, check out our one-piece IN BOX™ for siding on page 22.

### FS8091F Installation

#### Before siding is up...

- 1 Remove knockout and insert cable connector. Push NM cable through connector.
- 2 Attach outlet box to substrate with (2) screws.
- 3 Install device, FS8091F works with all single-gang devices.
- 4 Caulk as required.

#### after siding is up...

- 1 Cut hole in siding.
- 2 Break flanges off the back of the FS8091F. Remove knockout. Insert cable connector in KO, then push NM cable through connector.
- 3 Attach outlet box to substrate with (2) screws.
- 4 Install single-gang device (regular or GFCI).
- 5 Caulk as required.

Catalog Number	UPC/DCI/NAED MFG #01 8997	Description	Unit Pkg	Standard Pkg
FS8091F	17303	Outlet Box for installing devices on siding	10	10

For installation  
**AFTER**  
siding is installed

Arlington's one-piece FS Box ensures a solid, UL Listed installation every time. Perfect for mounting GFCIs, switches, and outlets on all siding types or flat surfaces, the FS Box is easy to install and convenient to use.

FS8171 for Dutch Lap Siding

- Non-metallic
- For use with All Siding Types...1/2", 5/8", Dutch Lap, and Flat Surfaces.
- For GFCI, switches, and outlets.
- UV-rated for outdoor applications.
- Provides a UL Listed installation.
- Textured, paintable finish.

Install your choice of either a GFCI, Switch or Duplex receptacle. The FS Box's unique design accepts them all!

Now There's a Plastic, Weatherproof FS Box for Siding!

# IN BOX™ Weatherproof-in-use, Recessed Electrical Box for Flat Surfaces and Siding

DBVR1C

DBHR1W

For existing **FLAT SURFACES** and siding

One-piece, recessed electrical box with weatherproof-in-use cover for flat surfaces in existing construction. Non-metallic cover and base. Accepts most single-gang wiring devices and uses standard indoor wall plates or a GFCI cover plate. Box and white cover are textured/paintable. UV-rated plastic for long outdoor life.

## IN BOX for retrofit, flat surfaces and siding includes...

Box with weatherproof-in-use cover, installed bug plugs, (1) standard duplex and (1) standard GFCI face plate, (1) set installation screws, (1) NM cable connector, and (1) roll of caulk.

## Installation Instructions

**1** Cut a 3-1/4" x 5-1/2" hole in substrate. Pull wiring.

**2** Apply the supplied caulk around back edges of flange. Install NM cable connector and wire, then press onto surface.

**3** Attach IN BOX with stainless steel screws provided.

**4** Install wiring device per manufacturer's instructions, local and National Electrical Codes.

Accepts most single gang wiring devices, and uses a standard indoor wall plate. DBVR1C shown.

DBHR1W shown. **IN BOX Saves Time. Looks Great!**

- **IN BOX's one-piece assembly replaces the installation of an electrical box and bubble cover assembly**
- **Installs in the wall, so less of it shows outside**
- **Use the retrofit IN BOX on flat siding, T-111, and other flat surfaces**
- **Install option: Cover is removable for easier device installation**
- **No gaskets required**

Bug Plugs ship installed in all IN BOX styles to seal unused cord hole openings.

**Note:** Meets 2008 NEC Section 406-8; for the protection of exterior outlets which require the use of a weatherproof while-in-use cover for all outdoor 15 or 20 AMP receptacles.

Replacement covers and siding profiles to convert for use on existing siding available on page 25. Patents Pending.

# IN BOX™ Weatherproof-in-use, Recessed Electrical Box for NEW Vinyl Siding

For  
**NEW VINYL**  
siding

Our one-piece **IN BOX** for new siding eliminates the need to install an electrical box and a siding block, and a bubble cover assembly.

- **Outer flange covers cut ends of siding**
- **Fits all siding types**
- **Install before new siding goes up**
- **Clear or white, vertical or horizontal styles**

DBHS1W

DBVS1C

## Installation of IN BOXES or NEW Vinyl Siding

**1** Cut hole. Pull wiring. Install NM cable connector and wire. Attach IN BOX to substrate.

**2** Install siding, inserting the cut ends of the siding under the outer flange of the IN BOX.

**3** Install wiring device

Siding profile adapter plate allows use of the retrofit IN BOX on any siding type.

**IN BOX accepts most single gang wiring devices, and uses a standard indoor wall plate.**

# Siding Solutions from Arlington!

Arlington's siding mounting boxes and kits give you what you need to install any kind of receptacle or light fixture on any kind of siding—before or after the siding goes up!

Outdoor receptacles, boxes, meters, light fixtures, even extra large coach lamps, can now be mounted firmly and securely with Arlington's 'Siding Solutions'! Whatever your siding type or installation condition, we have what you need. From flanged to unflanged, standard electrical boxes or deeper ones for GFCIs, regular or extra large mounting plates and individual boxes and covers, even flat surface designs, Arlington siding mounting products provide the answer.

Installation is fast and easy. And with Arlington's mounting boxes and kits you get smooth vertical mounting of all fixtures and receptacles. Plus, mounting boxes made of UV-rated plastic provide long outdoor life. The textured surface is paintable to blend in with the color of your siding.

For Canadian shipments the grounding lug is included as required by CSA.

Refer to the Product Selector Guide to find the Arlington solution that's right for you!

## Siding Box Kits

Arlington siding box kits give you everything you need for a UL Listed and approved installation—because this siding box is an actual electrical junction box!

Each kit includes an electrical box, cover, and NM cable connector and works on all siding types, before or after the siding is installed. Before the siding is installed, use the 'flanged' 8081F, 8081FDBL, 8082F, or 8091F. If the siding is up or for retrofit work, break the flanges off the flanged styles above along the prescored lines or use our 'flangeless' styles 8081 or 8081DBL. For fixtures and receptacles that require GFCIs, use the deeper 8091F.

Easy to install, this series of siding mounting boxes features premolded screw locations for devices and lighting fixtures. The box enclosure can be installed in two ways. The first method uses the location holes for a typical 3-1/2" or 4" diameter box. The second uses the screw locations for device mounting when rotated 90°.

These mounting boxes provide a rectangular hole for accessing the wire connections in the box enclosure.

For Standard Light Fixtures and Devices

For Large Light Fixtures

For Fixtures and Devices on T-111 Siding

For GFCIs, Large Devices and Fixtures, Fixtures with Ballast

## IN BOX™ Weatherproof-in-use, Recessed Electrical Box for EXISTING Vinyl Siding

For EXISTING VINYL siding We fitted our retrofit IN BOX with a siding profile adapter plate for use on existing siding!

### Installation of IN BOXES for EXISTING Vinyl Siding

- Using the siding adapter plate as a template, cut hole in existing siding. Pull wiring.
- 2A. Apply caulk around edges of back of adapter. Press onto siding.  
2B. Attach adapter to siding with short screws (supplied) through the holes noted above. Trim excess caulk as needed.
- 3A. Apply caulk to reverse side of IN BOX flange.  
3B. Install NM cable connector and wire, then attach with long screws (provided). Trim excess caulk as needed. Install wiring device.

## Installation Instructions for New Rigid Siding - Method 1

**1** Install NM cable connector and wire. Attach IN BOX to stud.

**2** Install moisture barrier around IN BOX per manufacturer's instructions.

**3** Cut rigid siding to fit around IN BOX. Caulk around box.

**4** Install wiring device per manufacturer's instructions, local, and National Electrical Codes. Accepts most devices and a standard indoor wall plate. DBVM1W shown.

## Installation Instructions for New Rigid Siding - Method 2

**1** Make a 3-1/4" x 5-1/2" hole in plywood. Pull wiring through opening.

**2** Install NM cable connector and wire. Attach recessed IN BOX to substrate, then install moisture barrier around box as shown above in Method 1.

**3** Cut rigid siding to fit around IN BOX. Caulk around box.

**4** Install wiring device per manufacturer's instructions, local, and National Electrical Codes. Accepts most devices and a standard indoor wall plate. DBVM1W shown.

## IN BOX™ Siding Profile Adapter Plates for Existing Siding Retrofit

For Existing  
**VINYL**  
siding

Adapter plates convert the flat surface retrofit DBVR1 and DBHR1 IN BOX series (see page 21) for use on existing siding. Order the siding profile adapter plate to fit your particular siding type. UV-rated plastic for long outdoor life. Paintable.

DBVR141

Catalog Number	UPC/DCI/NAED MFG #01 8997	Orientation	Siding Type	Std Pkg

For installation **BEFORE** siding is installed

## Dryer Vent Mounting Block Kit

Arlington's one-piece, non-metallic dryer vent mounting block kit provides the secure, attractive – and time-saving way to install dryer vents on new siding.

Our 8 x 8 inch dryer vent mounting block kit comes complete with a low profile, louver-type hood, a snap-together 4" aluminum tube and a siding block with a built-in j-channel. It fits all siding types: 1/2" and 5/8" step, and dutch lap.

UV-rated, and weather-resistant for long outdoor life, they're also paintable to match any color scheme.

- **Clean, attractive installation – overhang covers cut ends of siding**
- **Smooth vertical mounting of dryer vents on any siding type**
- **For new siding construction**
- **Easy installation**
- **Colors: Paintable White**
- **Pre-mounted vent: 4" x 10-1/2" tube dimension**

### Installation of Dryer Vent Mounting Block Kit

- 1** Cut hole in substrate with a 4-1/2" hole saw. Insert vent tube into opening.

- 2** Use screws to mount dryer vent to substrate through flanges.

- 3** Install siding. Overhang on vent flange hides cut ends of siding. Caulk as required. DV1 Dryer Vent Mounting Block installed.

Catalog Number	UPC/DCI/NAED MFG #01 8997	Description	Siding Type	Unit Pkg	Standard Pkg
DV1	43607	Dryer Vent Mounting Block 8" x 8" vented plastic block Mounts before siding	All	1	10
