

*Powering Business Worldwide*

## Designed for energy efficiency, performance and value.

Focused on contractor-friendly designs in economic projects, Halo Commercial offers new construction, remodel, and retrofit solutions ideal for a broad range of applications including hospitality, retail, office, healthcare, and education. Designed for performance and value, Halo Commercial achieves the perfect balance of optical control and efficiency with lower watts per square foot.

**Innovation** you can rely on™

# Lighting Professional

No longer sacrifice performance and optical control on budget-minded projects. Halo Commercial provides a full family of recessed luminaires featuring popular 6-inch and 8-inch apertures. Choose from traditional light sources including tungsten-halogen, compact fluorescent, and metal halide. Halo Commercial is also available in LED, providing energy savings and long life.

## Simplified Wiring and Control

Halo Commercial offers universal 120-277V input on compact fluorescent ballasts, metal halide ballasts and LED drivers to simplify the housing selection process and installation. For 347V LED input, use Halo step down transformers H347 and H347200. Compact fluorescent and metal halide ballasts are available with dedicated 347V input.

Compact fluorescent housings can be specified with optional emergency battery packs and dimming. The battery packs are available with remote or internal test switch / indicator light, and dimming is available with either two-wire phase cut or 0-10V analog dimming.

The PD6 LED series offers performance, code compliance, universal voltage, phase cut and 0-10V dimming with a single driver. Optional emergency battery pack with remote or internal test switch / indicator light can also be specified. Halo Commercial drivers have been extensively tested for reliable operation and compatibility with popular controls including DEVINE and SKYE wall boxes from Eaton's Cooper Wiring Devices business and Greengate Room Controller from Eaton's Cooper Controls business. Backed by the luminaire's five-year warranty, the PD6 LED system simplifies controls integration, making it perfect for daylight harvesting, occupancy sensors and building automation systems.

## Customize Your Lighting Design

Halo Commercial packages a full vocabulary of lamp types and optical distributions to meet virtually any lighting design challenge. Reflector types include vertical and horizontal lamp compact fluorescent, open wall wash, baffle, lensed and open trim. An electrically non-conductive 'dead front' shower trim is available when required by local codes. All Halo Commercial reflectors are self-flanged and can be customized with a pallet of finish options.

Halo Commercial introduced the world's first downlight with generic LED lamp listing providing maximum flexibility of lamp types. The PD6 LED series produces over 2,000 delivered lumens and is available in 2700K, 3000K, 3500K and 4000K CCT at both 80 and 90 CRI allowing light quality to be tailored to a given application.

**Specular Clear (C)**

**Specular Gold (G)**

**White (W)**

**White Baffle (WB)**

**Black Baffle (BB)**

**Dead Front (DF)**

**Crossblade Reflector (CB)**

# Contractor

Rely on Halo Commercial downlighting for versatility and ease of installation.

## Contractor-friendly features allow for quick and easy installation

### Electrical Connections

An oversized junction box to accommodate both factory and field connections. Wago quick connects are provided for rapid main connections.

The 1/2" and 3/4" trade size pry-outs are positioned for straight conduit runs. The oversized flexible conduit facilitates ease of installation, service and inspection.

Products feature universal input ballast for CFL and metal halide sources and universal drivers for LED fixtures.

## New Construction and Remodel Installation

No Fuss™ Bar Hangers come pre-installed and centered. Centering marks on the bar hangers allow consistent positioning of the fixtures.

Same housing frame doubles as new construction and remodel. Easily convert new construction frames to remodel frames by removing the brackets.

Boat-shaped frame allows for easy, below-the-ceiling remodel installation. Remodel clips are provided.

Adjustable collar accommodates ceilings up to 2" thick.

Torsion springs attach reflector to spring receivers in the collar.

CFL housings come with convenient wattage peel-down labels for de-watting from 42W to 32W to 26W, reducing housing type.

## LED Retrofit Installation

Retrofit a broad range of downlights from 5-11/16" to 6-3/8" aperture with Halo Commercial PD6 LED retrofit kits.

Disconnect all existing connections to the ballast or socket cup.

Mount the new junction box and driver whip assembly in the plenum and insert one end of the whip assembly into the existing junction box to make connections.

The trim ring mounts in ceilings up to 2" thick. The springs have three mounting locations on the ring to accommodate different ceiling thicknesses.

Using the speed clamps on the reflector, attach the LED module to the LED reflector.

Run the LED quick connect end of the whip assembly with socket through the trim ring and connect to the LED module.

Insert torsion springs located on the LED reflector to push the LED reflector module assembly into the spring receivers on the collar.

Turn your business into a one-stop-shop for commercial recessed downlighting. Easy ordering, simplified shopping experience.

**A complete luminaire consists of a housing and reflector, ordered separately. Add an LED module for LED luminaires.**

No Fuss™ Bar Hangers come pre-installed and centered for consistent mounting. Additionally, a new construction housing can easily be converted to a remodel housing eliminating the need to stock an extra housing type. The unique, boat-shaped frame makes below-the-ceiling installations a breeze.

PDM6A827 PDM6A927	<p>2700K nominal 2725 2700K 3000K 3500K 4100K 5000K 6500K</p>
PDM6A830 PDM6A930	<p>3000K nominal 3045 2700K 3000K 3500K 4100K 5000K 6500K</p>
PDM6A835 PDM6A935	<p>3500K nominal 3465 2700K 3000K 3500K 4100K 5000K 6500K</p>
PDM6A840 PDM6A940	<p>4000K nominal 3985 2700K 3000K 3500K 4100K 5000K 6500K</p>

For LED luminaires, the various color temperatures and CRIs are specified by the LED module, reducing stocked items while simplifying the shopping experience. These LED modules are ordered separately from the housing and reflector, and are field interchangeable and installable.

Select from shallow reflectors for applications with constricted ceiling heights; wall wash reflectors for enhanced vertical illumination; or tall reflectors for the most optimum downlight performance.

### ENERGY STAR® and Title 24 Approved

First to market an ENERGY STAR® recessed downlight in the commercial space, Eaton's Cooper Lighting business is committed to delivering transformational technology in the lighting industry. The Department of Energy (DOE) and Environmental Protection Agency (EPA), as well as the California Energy Commission (CEC) provide guidelines and requirements to reduce greenhouse gas emissions and energy consumption by promoting energy efficiency. All Halo Commercial products are ENERGY STAR® listed and meet California's Title 24 requirements as a high efficacy luminaire.

### Emergency Battery Pack Option

Emergency lighting is an essential component to retail and office spaces, providing lighting in the event of an unexpected power outage or disaster. The National Fire Protection Agency (NFPA) and National Electric Code (NEC) define stringent performance requirements for luminaires with battery backup.

All Halo Commercial products with emergency battery backup are equipped with dual input 120/277V battery packs that provide 90 minutes of emergency illumination.

Halo Commercial offers two test switch options – Remote emergency (REM) for standard remote test switch, or Integral emergency (IEM) for integral test switch where the test button is punched into the reflector. The IEM option optimizes the time required for a site installation with a simple push button.

### City of Chicago Environmental Air (CCEA) Approved

City of Chicago electrical code has mandated specific luminaire construction requirements in order to receive the CCEA Approved marking. Compliance requires that conductors be installed in metal that is air tight, with gasketed openings and whip requirements. All Halo Commercial products have a Chicago Plenum option for City of Chicago compliance.

## 5 REASONS TO STOCK HALO COMMERCIAL

1. Comprehensive offering in 6" and 8" apertures that support new construction, remodel and retrofit applications in regular and shallow plenum spaces.
2. Reduced SKU complexity with universal voltage; the same frame for new construction and remodel; and field interchangeable LED modules and optics.
3. Fully-loaded product line equipped with 0-10V and phase cut dimming; Chicago plenum; and integral and remote battery backup options.
4. Simple ordering, contractor-friendly features and lower watts per square foot.
5. Stocked items and 10-day quick ship backed by Eaton's Cooper Lighting super performance and warranty.

# 6" LED New Work / Remodel

- No Fuss™ Bar Hanger System comes pre-installed and centered
- New construction frame easily converts to re-modeler frame
- Boat-shaped frame allows for easy, below-the-ceiling installation
- Accommodates ceilings up to 2" thick
- Universal voltage, dual dim driver with leading edge, trailing edge phase cut and 0-10V to 10%
- Suitable for shallow plenum, 2x6 framing, and 2x8 framing
- 1000, 1500, 2000, and 3000 Lumens; 80 and 90 CRI; 2700K, 3000K, 3500K, and 4000K CCT options
- Excellent thermal performance for 70% lumen maintenance at 50,000 hours
- Optional Beam forming optics - Flood, Narrow Flood, and Soft Focus Lens accessory
- Integral and Remote test emergency option
- Chicago plenum option

Reflector	Description
692SC	Specular Clear with White Flange
692H	Semi-specular Clear with White Flange
692W	White with White Flange

Baffle Reflector	Description
693WB	White Baffle with White Flange
693BB	Black Baffle with White Flange
693SNB	Satin Nickel Baffle and Flange
693TBZB	Tuscan Bronze Baffle and Flange

Regressed Eyeball Directional Reflector	Description
694WB	White Eyeball, Baffle and Flange
694SNB	Satin Nickel Eyeball, Baffle and Flange
694TBZB	Tuscan Bronze Eyeball, Baffle and Flange

Wall Wash Reflector	Description
695WW	Specular Reflector, Repositionable Specular Kick Reflector and White Flange

Shallow Baffle Reflector	Description
696WB	White Baffle with White Flange

Accessories	Description
BFR56NFL <sup>1</sup>	Beam forming reflector, narrow flood distribution
BFR56FL <sup>1</sup>	Beam forming reflector, flood distribution
BFR56MH <sup>1</sup>	Media holder, accepts one 3.45" lens
L345SF <sup>1</sup>	3.45" diameter soft focus lens
WW695SC	6" wall wash kick reflector, specular clear (use for double or corner wall wash or replacement)

1. Available with shallow reflectors only.

# 6" Compact Fluorescent Horizontal

- No Fuss™ Bar Hanger system comes pre-installed and centered
- New construction frame easily converts to re-modeler frame
- Boat-shaped frame allows for easy, below-the-ceiling installation
- Convenient peel-down wattage label from 42W to 32W to 26W
- Accommodates ceilings up to 2" thick
- Suitable for shallow plenum, 2x6 framing, and 2x8 framing
- 0-10V and phase cut dimming to 5% option
- Integral and Remote test emergency option
- Chicago plenum option

# 8" Compact Fluorescent Horizontal

- No Fuss™ Bar Hanger system comes pre-installed and centered
- New construction frame easily converts to re-modeler frame
- Boat-shaped frame allows for easy, below-the-ceiling installation
- Convenient peel-down wattage label from 42W to 32W to 26W
- Accommodates ceilings up to 2" thick
- Vertical adjustable socket cup for superior lamp positioning and performance
- Suitable for 2x8 framing
- 0-10V and phase cut dimming to 5% option
- Integral and Remote test emergency option
- Chicago plenum option
