HOW TO CHOOSE THE RIGHT FAN

WHAT SIZE FAN DOES YOUR ROOM REQUIRE?

The best rule of thumb is to go as large as your room can accommodate; for maximum airflow, you want at least 18 inches of clearance between the edge of the blade and your wall or ceiling. Here are a few suggestions to guide you:

Room size	Room type	Blade Sweep
90 square feet or less	<ul style="list-style-type: none">• Small bedroom or office• Galley kitchen	30" and 42"
90 to 100 square feet	<ul style="list-style-type: none">• Over a kitchen table• Breakfast nook• Small screened-in porch• Intimate dining room	44" and 46"
100 to 150 square feet	<ul style="list-style-type: none">• Most bedrooms• Most larger kitchens• Formal dining room	52" and 54"
Over 150 square feet	<ul style="list-style-type: none">• Great room• Large outdoor patio• Master suite	56" to 70" or multiple fans

A few additional tips:

- Larger rooms can often accommodate more than one ceiling fan. For example, a great room measuring 30' x 15' could easily handle two 52" ceiling fans.
- You'll notice every Kichler® ceiling fan lists its blade sweep and downrod options. Most Kichler ceiling fans are sold with downrods to accommodate 8' ceilings (4" to 6" downrod) or 9' ceilings (12" downrod). If your ceiling is higher, refer to the Main Catalog K411 page 233 for matching downrod options.
- All Kichler stem mounted ceiling fans can be installed on sloped ceilings, no greater than 20°. See page S489 of this catalog and page 230 of the main catalog K411 for additional slope adaptor options up to 60°.

minimum of 12' of clearance
between the blades and the floor.

SAVING MONEY & ENERGY

ENJOY THE COMFORT OF YOUR NEW FAN & THE ENERGY SAVINGS!

Saving on energy costs has never been so easy and comfortable. Kichler® has the largest selection of ceiling fans featuring DC Motors – and they operate 70% more efficiently than standard AC motors. Our DC motors also operate at a cooler temperature for a longer overall life.

Plus, all Kichler ceiling fans are designed to create a cooling effect in the summer (counter-clockwise rotation) and circulate warmer air down into the living space in the winter (clockwise rotation). Many Kichler ceiling fans are also ENERGY STAR® certified and feature highly efficient fluorescent lighting.

See How to Save
Money & Energy!

Outdoor/Indoor

CEILING FANS

CLIMATES™ Ceiling Fans & Accessories

Outfit your coastal escape with the finest, most durable wet-rated ceiling fans available for harsh outdoor elements. Repeated saltwater spray, extreme heat and cold, and constant high UV exposure, are no match for Climates superior construction. Fan bodies and select blades are crafted from durable ABS plastic, creating a superior level of corrosion resistance.

WET-Rated Ceiling Fans

Outdoor living spaces that are open to the elements, such as a pergola or a lanai are the ideal place for our wet location ceiling fans. Kichler® wet location ceiling fans feature a powder coated finish, stainless steel mounting hardware, aluminum support system and all-weather ABS blade options that help combat direct exposure to rain or repeated water spray.

DAMP-Rated Ceiling Fans

Kichler's Damp location rated ceiling fans are engineered for hot, damp, high-humidity areas such as an enclosed porch, master bath, or a laundry room, where high humidity or condensation are present. Damp-rated ceiling fans feature a powder coated finish with a galvanized undercoat and stainless steel mounting hardware. Many are available with ABS plastic blades.

- For use with most ceiling fans
- Max. 5 AMP
- Includes White, Almond, and Ivory Faceplate and Control Knob

COOL TOUCH CONTROLS

TECHNOLOGY THAT DOES THE THINKING FOR YOU

Our CoolTouch™ Control System is intuitive to use and puts total control in your hands. The compact design is as stylish as the fan it operates. The patent-pending technology controls every feature and delivers a host of benefits you can sit back and enjoy:

- Adjusts all blade speeds, plus forward and reverse (on select models) – counter-clockwise for summer cooling and clockwise for winter warming.
- Up (on select models) and down lights easily turn on and off with the added feature of variable dimming. Intelligent return then allows you to return to your favorite preset brightness level.
- Replace a dedicated wall switch with the added convenience of a remote. Or, mount the remote to any flat surface.
- The CoolTouch controller runs multiple Kichler® fans – so your “great” room can truly look spectacular.

CoolTouch™
6-Speed DC Control System

See pages 224-229 in our Main Catalog K411 for more details and to see all of our CoolTouch™ options.

Equivalent Light Output

To determine which qualified CFL light bulbs will provide the same amount of light as your current incandescent light bulbs, consult the following chart:

Incandescent Light Bulbs Watts (W)	Incandescent Minimum Light Output Lumens	Common CFL Light Bulbs Watts (W)
40	450	9-13
60	800	13-15
75	1,100	18-25
100	1,600	23-30
150	2,600	30-52

SIT BACK & RELAX

WE'VE TAKEN CARE OF EVERYTHING

With a Kichler® Ceiling Fan, the beauty is in the flawless craftsmanship. From kitchen to living room ... master bedroom to sunroom or out of doors, you'll discover designs that bring your style vision to life and features that make your ceiling fan easy to choose, easy to install and easy to own. Kichler makes it beautiful to escape the every day with fans that stand the test of time — and options that deliver more than you expect.

How to Install Your
Kichler Ceiling Fan.

- Lamps are included on all products.
- Wattages stated are the maximum recommended, however, you may use lower wattage lamps to suit your lighting needs.
- Finishes for fixtures installed outdoors are subject to change due to prolonged exposure to sunlight, airborne pollutants and other forms of weathering.
- All electrical products are rated as 120-volt, AC unless otherwise noted.

- All electrical products are certified and listed to UL/CSA/ETL Standards for use in U.S.A. and Canada.
- All products featured in the outdoor section are certified and listed to UL/CSA standards for wet or damp location except where noted.
- To serve you better, Kichler® reserves the right to make improvements to the products in this catalog. Therefore, some products may change during the

life of the catalog and the product information contained in this catalog may also have changed.

- Kichler® Lighting Products are not produced or associated with any Native American Indians, nor are they a Native American product or the product of a particular Indian, Indian tribe or Indian arts and crafts organization as defined by 25 U.S.C. §305 et. seq.

We go to great lengths to assure the metal and glass finishes shown in the catalog match the actual products, but printing variations and variations in chemical finishes and the nature of hand applied finishing will cause some differences between the printed images and actual product, and from one product to another.
