

Fluorescent INDUSTRIAL, STRIPS & CHANNELS

Simkar is proud to introduce the most innovative and comprehensive Industrial Lighting offering available. Our product range covers applications from basic strips to super efficient and innovative Fluorescent Hi-bays combining the best materials with energy efficient electronics and light sources to provide not just a solution but the best solution for almost any environment.

Adjust-a-Bay fluorescent bay lighter combines energy efficient T5 or T8 lamps with a unique, adjustable socket bracket

that positions the lamps to provide three different beam patterns. The tool-less adjusting knobs allow the fixture to be used in hi-bay, mid-bay or low-bay applications as needs change. Combined with reflect-a-bay Simkar has a solution for every fluorescent bay-lighting need.

EN2 and EN3 provide superior performance in harsh environments.

Latitude adds a decorative flair in areas where form and function are both a factor.

This energy-efficient new product has the flexibility to provide lighting in industrial, educational, or retail applications. **Adjust-a-Bay** offers 3-way user adjustability to perform as a low bay, high bay or aisle lighter. Units are available with T5 or T8 lamps in a four or six lamp configuration. Optional upright provides the ultimate in design flexibility.

T5 Fixture: 55° C Ambient Temperature

T8 Fixture: 35° C Ambient Temperature

632/654	48.4"	29.7"	4"	28 lbs.

40

Housing

Fixture has a die formed heavy gauge steel ballast channel with a high-gloss baked white enamel finish over rust-inhibiting phosphate coat. Die-cast aluminum ends have galvanized steel side rails. A hinged ballast channel cover with captive hardware can be opened without tools. Fixture is shipped fully wired. Ample knockouts provided.

Adjustable Optics

Tool-free, adjustable optics assembly provides three user-selectable light distribution patterns: narrow for aisle lighting; medium for high bay; and wide for low bay applications. Easily change the position of the lamp assembly within the reflectors utilizing two thumb screws located on each end cap.

Electrical

Fully wired for 120-277V, 50-60 Hz operation with thermally protected, automatic resetting, Class P, Sound rated A, programmed-start, electronic T5 HO ballast. The 6 lamp unit contains 1-(2) lamp and 1-(4) lamp T5 HO ballast. The 4 lamp unit contains 1-(4) lamp T5 HO ballast as standard. Switch from 6-4, 6-2, 6-0, 4-2, 4-0. Low voltage, high-2-low control on six lamp unit. System watts are 224W (ADJUST 454) and 360W (654). UL listed.

Reflector

The Adjust-a-Bay incorporates computer designed, faceted, extra wide and deep, highly reflective MIRO 4 reflectors which offer 95% reflectance. Sharp cut-off produces maximum usable lumens and minimizes glare. Slotting is available on all reflectors for cooler operation and upright. Seven slots are located on each reflector. Each slot measures 1/2" wide x 5" long.

Mounting Options

A variety of mounting options are available: surface, pendant, chain hanger assembly, adjustable cable, mono-point hook or slide box. Please order mounting accessories separately.

Light Distribution Settings

The narrow setting provides uniform illumination for tall, vertical surfaces like racking and increased horizontal illumination for aisles below. The middle setting is excellent for mounting heights above 20 feet, while the wide setting provides glare-free illumination at lower mounting heights (below 20 feet). Use the multi-purpose Adjust-a-Bay to light an entire facility to simplify installation and maintenance.

See the light ... see the difference in your energy bills

The **Adjust-a-Bay** offers the following unique features to provide non-stop energy savings and lower installation & maintenance costs:

- Adjustable optics; three settings
- Energy saving; electronic T5 HO and T8 systems
- Exposed reflectors for cooler, cleaner operation
- Extra deep and wide reflectors for superior light control
- Tool-less ballast access
- Flexible mounting options

Put Light Where You Want It

Three user-selectable beam patterns for maximum illumination from a minimum number of fixtures.

Superior Illumination

Extra deep and wide MIRO 4 reflectors punch light downward for maximum horizontal and vertical illumination with less glare.

Same Light at a Lower Cost

Control-friendly, energy efficient programmed start ballast minimizes input watts and optimizes lamp life. Combine with optional motion sensor to increase savings. Nothing saves like turning the lights off!

Runs Cooler, Stays Cleaner

Thermally efficient, fully exposed reflectors maximize lumen output at higher ambient temperatures and repel dirt. Self-cleaning convective airflow keeps the fixture cool.

Circulating convective airflow

Easy to Access

Tool-less ballast access via captive thumbscrew for quick installation and servicing. Don't waste valuable labor and equipment time fiddling with screws.

Simkar's new **Reflect-a-Bay™** is the perfect complement to our innovative Adjust-a-Bay series of product. Reflect-a-Bay™ incorporates the same attention to quality and detail as its predecessor, offering both T5 and T8 in four, six, and eight lamp configurations. Coupled with a wide array of options and accessories, Reflect-a-Bay™ is the perfect choice for manufacturing, warehouse, retail or institutional applications, be they new installations or retro-fits.

More light. Lower costs. Easier to install.

Housing

Die formed heavy gauge steel housing with high-gloss baked white enamel finish over rust inhibiting phosphate coat. Fixture is shipped fully wired. Ample knockouts provided.

Reflector

The Reflect-A-Bay is available with an 85% specular reflector for narrow to medium distribution, or a white reflector for wide distribution, perfect for low bay applications.

Mounting Options

A variety of mounting options are available - please see next page for details.

- Uplighting available on all models
- Save up to 20% in energy when used in place of traditional HID
- Instant-on
- Choose from 7 mounting options, from a chain hanger to a center mount slidebox that's great for HID retrofits
- 4, 6, and 8 lamp versions
- For use with T5 or T8 lamps

Electrical

Fully wired for 120-277V, 60 Hz AC operation with ETL-CBM, thermally protected, automatic resetting, Class P, sound rated A, programmed-start, electronic T5 HO or T8 ballast. High ballast factor T8 ballasts are also available. 8 lamp unit contains 2 - (4) lamp ballasts. The 6 lamp unit contains 1-(2) lamp and 1-(4) lamp ballast. The 4 lamp unit contains 1 - (4) lamp ballast as standard. UL listed.

Choice of reflectors:

- 85% specular with medium to narrow distribution
- White reflector for wide distribution - great for lowbay applications

The MIRO® Industrial, designed to replace conventional HID lighting in commercial, industrial, educational and retail applications, combines a performance-boosting MIRO 4 aluminum reflector (95% reflectivity) with the proven energy efficiencies of T5HO or T8 linear fluorescent lamps. This provides increased light levels, improved color rendition, and excellent uniformity while using up to 75% less energy. The MIRO Industrial, available in a choice of sizes, lamp configurations, and mounting, is a cost-effective solution for areas traditionally illuminated using HID fixtures.

Dimensions

Housing

Die-formed heavy gauge steel with high-gloss, baked white enamel finish over rust inhibiting phosphate coat. 7/8" knockouts for easy installation.

Reflector

Specular reflector manufactured from MIRO 4 aluminum in 4' sections to maximize light output and control beam spread. 95% reflectance.

Electrical

Fully wired for UNV 120-277V, 50-60Hz operation with thermally protected, automatic resetting Class P, sound rated A ballast as standard unless otherwise specified. UL listed damp location.

Mounting

Ceiling surface mount (*HO and VHO units must be suspended at least 6" from ceiling for cooler operation and longer ballast life*), spacing available with Snapper Bracket (SN), CA24 chain kit or stem mount individual or continuous row. AC aligner clips available for continuous runs.

LOUVERED INDUSTRIAL FLUORESCENT LIGHTING

Introducing Latitude

Rugged elegance best describes the Latitude series of fixtures. We begin with an industrial reflector in either white (LAW) or specular finished (LAM) and add a parabolic aluminum louver in your choice of two finishes: white or semi specular and complete it by offering T5 or T8 lamps in 4' and 8' lengths.

The combination of the rugged industrial reflector and control of the louvers produces a simply elegant fixture with the hardiness of an industrial fixture married with the soft, cut-off performance of high-end, high-tech louvered luminaries. Latitude fixtures are available with a solid reflector or with apertures for an added element of uplighting to get the look you want with the performance you need.

The ability to mount the Latitude series individually or in continuous rows add the versatility and comfort desired in today's fast moving retail, commercial and educational environments.

Housing

Die-Formed heavy gauge steel with high gloss baked white enamel finish over rust-inhibiting phosphate coat. 7/8" knockouts for easy installation.

Reflector

LAW: Strong, rigid, die-embossed solid white painted steel "S" reflector in 4' sections is standard. Optional "A" reflector available with 12% uplight.

LAM: Strong, rigid, die-embossed solid MIRO™ 4 specular aluminum "S" reflector in 4' sections is standard. Optional "A" reflector available with 12% up-light.

Louvers

Louvers provided in 4' sections.

S: Die-formed, parabolic louver made of semi-specular aluminum.

W: Die-formed, parabolic louver made of white painted aluminum.

Electrical

Fully wired for 120-277V, 50-60Hz operation with thermally protected, automatic resetting Class P, sound rated A ballast as standard unless otherwise specified. UL listed damp location. Optional ballasts and configurations are available upon request.

Mounting

Ceiling, surface or suspended mounting options are available for individual units or continuous rows. White end caps included (packaged separately). Contact factory for continuous row applications.

Latitude Series Ordering Information

Series	Size	Uplighting	Louver	# Lamps	Lamp Type
LAW = Latitude White	4 = 4'	A = Aperture	S = Semi Specular parabolic	1	28T5 = F28 T5
LAM = Latitude with MIRO 4 reflector	8 = 8'	S = Solid (none)	W = White painted parabolic	2	32T8 = F32 T8
			Note: 1 per 4' Section	3	54T5H = F54 T5 HO
				2T = 2 lamps, Tandem	
				4T = 4 lamps, Tandem	
				6T = 6 lamps, Tandem

LATITUDE LOUVERED INDUSTRIAL FLUORESCENT LIGHTING CONTOUR

Introducing Latitude Contour

With its distinctive curved blade and rugged construction, Latitude Contour is the perfect fixture for retail, commercial and educational applications. Unlike the standard Latitude with parabolic louvers, Contour has a die formed, post painted, one piece louver with latches to secure the hinged louver to the housing.

Contour is available in 1,2,3, and 4 lamp versions in 4' and 2, 4, 6 and 8 lamp 8' models for 28 and 54 Watt T5 lamps and 32 Watt T8 lamps making Contour not only decorative but practical as well.

Housing:

Die-formed heavy gauge steel with high gloss post-painted baked white enamel finish over rust inhibiting phosphate coat. 7/8" knockouts for easy installation.

Reflectors

Strong, rigid, die-embossed solid white post-painted steel "S" reflector in 4' or 8' sections is standard. Optional "A" reflector available with 12% up-light.

Louver

Die-formed, curved blade louver made of white painted steel with die-formed latches for easy opening and re-lamping. Louvers provided in 4' sections.

Electrical:

Fully wired for 120-277V, 50-60Hz operation with an thermally protected, automatic resetting class "P" electronic ballast. Other ballasts and configurations are available upon request.

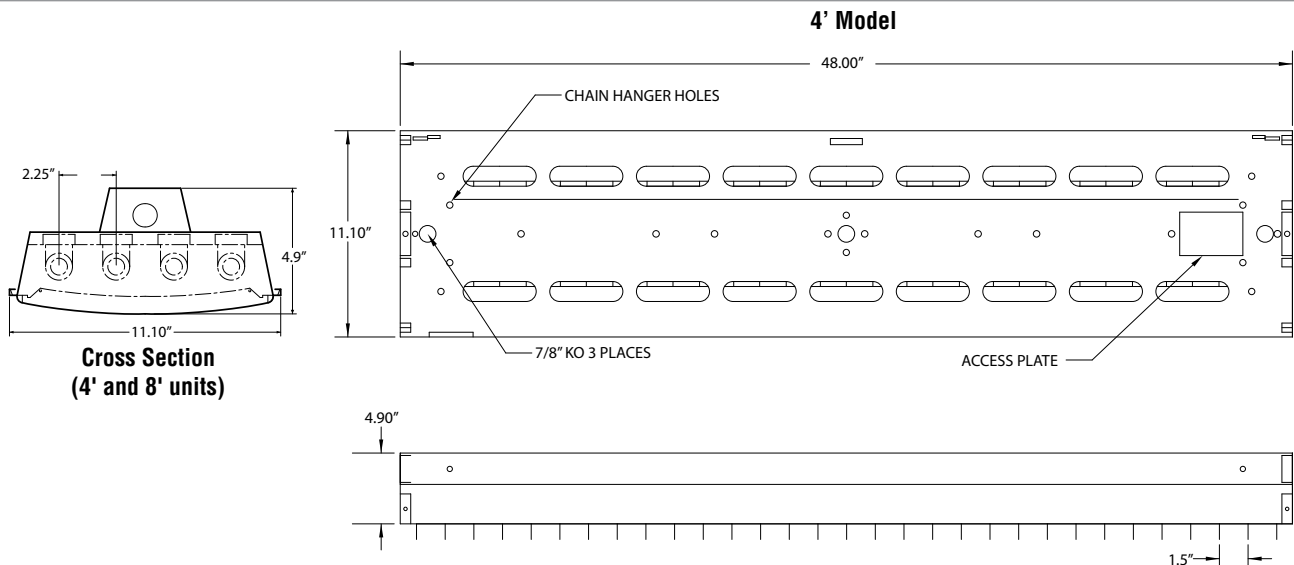

Mounting

Ceiling surface or suspended mounting options are available for individual units or continuous rows.

The Latitude series is the perfect choice for offices, commercial or industrial applications where a high end, high tech look and superior performance is required.

Tandem Model

Features & Benefits

- Top rated UL fire resistant housing: UL 94, 5VA reinforced thermal set polyester housing
- IP65 and IP67 ratings
- UL 746C rated f1 housing material meets outdoor UV and Water Immersion requirements
- Optional, simple, non-intrusive, external mounting hardware system available
- Securely attached, over-center latching system that are tamper proof ready
- Rugged, impact resistant 100% certified high impact acrylic or polycarbonate lenses
- Superior sealing system produces a dust free, wash down fixture with an IP65 rating for 2' units and IP67 for temporary immersion for the 4' and 8' units.
- NSF high pressure wash down approved for splash zone areas.
- Available with fluorescent T5, T5HO, T8, HPT8, or T8HO
- Available in 2', 4' and 8' lengths with 1, 2, or 3 lamps systems plus tandem configurations for the 8' units

EN2

Ideal for demanding environments where reliability and performance are paramount.

Simkar is proud to announce a family of demanding environment T5/T8 luminaires that will stand up to the forces of wind, water, temperature extremes, dust, salt, and abuse.

The EN2 series is an indoor/outdoor, corrosion proof, enclosed and gasketed fixture that does it all.

Simkar's weatherproof EN2 Series luminaires are a low profile design and comes in 2', 4', and 8' lengths. The 2' and 4' units come in 4" and 6.8" widths and the 8" unit is 6.8" wide.

You have choices of 1, 2, or 3 lamp versions to meet your lighting needs.

The housings are made of custom reinforced, thermal-set polyester that is corrosion resistant and will withstand extreme abuse and neglect.

The horizontally ribbed diffuser lenses were engineered for superior strength, ease of cleaning, and optical uniformity. These tough lenses are available in injection molded, clear, UV stabilized

polycarbonate (2' and 4' units) or 100% certified High Impact acrylic versions (4' and 8' units).

The sealing flanges of the lenses were designed to work in conjunction with our custom formulated foam-in-place, non-reticulated polyurethane gasket. This gasket is a seamless gasket that chemically attaches to the housing and is robotically applied to ensure consistency, accuracy, and reliability.

As a result of this design system, we have been able to achieve IP65 ratings for the 2' units (dust free with hose down) and IP67 ratings for the 4' and 8' units (dust free with temporary submersion under water for 30 minutes). The 2', 4', and 8' units are also certified for NSF high pressure wash down splash zone areas.

Our innovative latching and optional mounting hardware make installation and maintenance a breeze.

Certifications:

UL, cUL wet location, 25° C ambient

UL, cUL recognized components

NSF Certified for high pressure wash down splash zone areas

IP65 certified; 2' units: Dust-free, low pressure wash down

IP67 certified; 4' and 8' units: Dust-free, temporary immersion for 30 minutes

Housing

Housing to be 1-piece, custom reinforced thermal-set polyester that is corrosion proof and will withstand extreme abuse and neglect. Housing material to be UL 5VA and F1 rated. Gasket to be a seamless, custom formulated foam-in-place, urethane gasket, chemically attached to the housing and robotically applied to ensure consistency, accuracy, and reliability. All models are NSF Splash Zone rated for high pressure wash down. 2' unit to be IP65 rated for dust-free and wash down; 4' and 8' units to be IP67 rated for dust-free and water-free ingress protection (temporary submersion for 30 minutes).

Electrical

T8 and HPT8 technology: Ballast to be electronic, Instant Start, fully wired with quick-disconnect device: Universal voltage 120 – 277VAC, 50/60Hz, Starting temperature 0°F (-18°C),

< 15% THD, High-Power Factor, Thermally protected, Automatic resetting, Class P, Sound rating A.

T5 and T5HO technology: Ballast to be electronic Program Start, fully wired with quick-disconnect device: Universal voltage 120 – 277VAC, 50/60Hz, Starting temperature 0°F (-18°C), < 15% and < 20% THD, High-Power Factor, Thermally protected, Automatic resetting, Class P, Sound rating A.

Optics

Reflector to be die-formed, heavy gauge steel with high-gloss, baked white polyester finish over rust inhibiting phosphate coat or Miro 4 specular with 95% reflectivity. 2' Lens to be clear, ribbed, UV stabilized polycarbonate; 4' Lenses to be injection molded clear, ribbed, UV stabilized polycarbonate or 100% High Impact acrylic; 8' lens to be injection molded clear, ribbed, 100% High Impact acrylic engineered for superior strength, ease of cleaning, and optical uniformity.

Mounting/Latching

Mounting to be surface, ceiling, or wall capable. Optional stainless steel brackets or swivel brackets available without drilling into the housing. Safety strap included. Lens latches to be tool-free UV stabilized polycarbonate, positive lock over-center design, tamper-proof ready. Optional stainless steel latches available.

Certifications

Ballast: UL, CSA. Luminaire: UL Wet Location, IP65 (2' unit), IP67 (4' and 8' units), UL-cUL Recognized components; NSF Certified for splash zone areas.

EN3

Finally, an Indoor/Outdoor, corrosion proof, enclosed and gasketed fixture that does it all.

Simkar is proud to announce a family of demanding environment T5/T8 luminaires that will stand up to the nasty forces of wind, water, temperature extremes, dust, salt, and abuse. Simkar's weatherproof EN3 Series luminaires are a low profile design and are 14-1/2" wide and 52" long and are perfect for areas that need high light levels or high mounting heights. You have choices of 4 or 6 lamp versions to meet your lighting needs. The housings are made of custom reinforced, thermal-set polyester that is corrosion resistant and will withstand extreme abuse and neglect. A tough injection molded, clear, 100% certified High Impact acrylic gives you a tough, non-yellowing lens that will exceed your expectations. An optional

injection molded, UV stabilized polycarbonate lens is also available. The sealing flanges of the injected molded lenses were designed to work in conjunction with our custom formulated foam-in-place, closed cell polyurethane gasket. This gasket is a seamless gasket that chemically attaches to the housing and is robotically applied to ensure consistency, accuracy, and reliability. As a result of this design system, we have been able to achieve a number of impressive certifications: IP67 rating for a dust free luminaire capable of temporary submersion under water for 30 minutes, NEMA 4X ideal for marine environments, and NSF high pressure wash down for splash zone food processing areas.

Features & Benefits

Top rated UL fire resistant housing: UL 94, 5VA reinforced thermal set polyester housing

UL 746C rated f1 housing material meets outdoor UV and Water Immersion requirements

Two external mounting system available

Securely attached, over-center, stainless steel latching system that is tamper proof ready

Tool-free, hinged gear tray for ease of maintenance and convenience

Rugged, impact resistant lenses: non-yellowing, 100% certified High Impact acrylic

Superior sealing system produces a dust proof, wash down fixture with an IP67 rating

NSF high pressure wash down approved for Splash and Non-Food Zone Processing Areas

Available with Fluorescent T5, T5HO, T8, or HPT8 technologies

Available in a 4' housing with 4 or 6 lamp configurations

Certifications:

- UL, cUL wet location
- UL, CSA recognized components
- NSF Certified for high pressure wash down splash zone processing areas
- NEMA 4X
- IP66/67 certified: Dust-free, high pressure washdown/temporary immersion for 30 minutes

Housing

Custom blend, UL 5VA and f1 rated fiberglass reinforced thermal-set polyester

SMC manufacturing process for strength, reliability, fit and finish.

Optics

High reflectance, White reflector or minimum 92% high reflectance Specular aluminum reflectors

Injection molded, 100% certified High Impact acrylic Lens; Optional injection molded, UV stabilized polycarbonate lens available.

Lamp/Ballast/Socket Technologies

Lamps: T5, T5HO, T8, or HPT8 (not included unless ordered)

Ballasts: Electronic Instant Start T5, T8, and HPT8; Program Start T5HO

Universal voltages: 120-277 volt 50/60Hz or 347-480V 50/60Hz; Straight voltages: 347V 60Hz; 480V 60Hz; contact factory for other available voltages.

All ballasts are electronic, thermally protected with auto-resetting, Class P, sound rated A, high power factor, <15% harmonic distortion.

T5 and T5HO technology: Ballast to be electronic Program Start, Universal voltage 120 – 277VAC, 50/60Hz, Starting temperature 0°F (-18°C), < 15% and < 20% THD, High-Power Factor, Thermally protected, Automatic resetting, Class P, Sound rating A.

Rotational locking sockets ensure lamps are securely held in place.

Mounting and Latching

Two external mounting systems available: V-hook mounting or cables.

Stainless steel, positive-lock, over-center latches that are tamperproof ready.

WLH = 1 Wet Location wire Hub

ENTS = Tamperproof screws

ENTSD = Tamperproof screwdriver

EN3LTK = Lens tether kit

OV410 Enclosed gasketed fixture is equipped with a pressure-lock cam latch to tightly seal out vapor, moisture and dust. Available in 4' and 8' lengths as well as T8, T12, and high output.

Dimensions

Two Light

Four Light

Housing

Heavy-gauge steel with welded corners and compressible gasketing. KOs provided top and ends.

Shielding

Standard with clear acrylic prismatic lens.

Options

Popular options include wet location label (suffix WL) for ceiling mount only (includes RTV silicone seal).

Electrical

Fully wired for UNV 120-277V, 50-60Hz operation with thermally protected, automatic resetting Class P, sound rated A ballast as standard unless otherwise specified (except HO models). U.L. listed.

Mounting

Surface or stem, individual or continuous rows.

OV410 Gasketed Striplite Ordering Information

Housing

Die-formed, totally enclosed, fully gasketed, corrosion resistant aluminum housing. KOs provided.

Shielding

Extruded clear wraparound acrylic snap-in diffuser that will not discolor.

Electrical

Fully wired for UNV 120-277V, 50-60Hz operation with thermally protected, automatic resetting Class P, sound rated A ballast as standard unless otherwise specified (except HO models). U.L. damp location listed.

Mounting

Surface mount or stem hang, individual or continuous rows with OG-CB adapter.

OG Aluminum Enclosed Light Ordering Information

Series	# Lamps	Lamps	Ballast	Voltage
OG	1 = Single	48 = 48"	HO = High Output	UNV = 120-277V
	21 = Tandem, 2 Lamps	72 = 72"	HOB5 = High Output Electronic T12	120 = 120V
		96 = 96"	HOB11 = High Output Electronic T8	277 = 277V

Accessories

OG-CB = Continuous row adapter

PM(x) - Twin Pendant Mount - 2 white stems - specify length (24", 36", 48", 60", 72")

OS Directional Sign Light offers 360° swivel for precision aiming of light. Lip on flat lens allows unit to be aimed upward while still maintaining the UL listing for wet locations.

Lip on flat lens allows unit to be aimed upward.

Housing

Totally enclosed, fully assembled, corrosion resistant aluminum housings. Two splice boxes and endcaps included. Die-cast aluminum splice box tapped 3/4" -14 N.P. All hardware is corrosion resistant stainless steel. Gasketed sockets; use with remote ballast. KOs provided top and ends.

Shielding

Extruded clear wraparound acrylic snap-in diffuser that will not discolor.

Electrical

Fully wired for 120V, 60Hz operation. All units are supplied with remote, low temperature, weatherproof 120V ballast, unless otherwise specified.

Mounting

Run conduit (not supplied) from remote ballast to individual fixtures, continuous rows or end-of-row fixtures.

NOTE: Add 2 1/2" to total overall length for continuous runs. See dimensional drawings.

OS Directional Sign Light Ordering Information

Series	# Lamps	Lamp Type	Ballast	Voltage
OS	1	48 = 48" T12, 50.5" conduit centers	HO = High Output	120 = 120V
	2	72 = 72" T12, 74.5" conduit centers	VHO = Very High Output	277* = 277V
	21 = Tandem, Two Lamps	96 = 96" T12, 98.5" conduit centers		L/B = Less Ballast

*Non-weatherproof ballast only.

Accessories

OS SPLICE BOX = Splice Box for continuous row mounting

Dimensions

The CH Series is ideal for general purpose lighting in retail stores and commercial environments. Available in 2', 3', and 4' individual lengths as well as continuous row mounting.

CHTT

Flip-up sockets Patent #4,422,132

Dimensions

Housing

Die-formed heavy gauge steel with high-gloss, baked white enamel finish over rust inhibiting phosphate coat with removable wireway access panel. Ample knockouts provided on side, back and ends. Shipped fully wired and assembled, including socket saddle. Simply flip up socket bar and attach wireway cover with turn fastener provided. Machine installed shunts eliminate loose socket bar connections on electronic strips.

Options

Modular wiring, white or silver asymmetric or symmetric reflectors, and emergency lighting battery packs are available options.

Electrical

Fully wired for UNV 120-277V, 50-60Hz operation with thermally protected, automatic resetting Class P, sound rated A ballast as standard unless otherwise specified. UL listed damp location.

Mounting

Combination end plate/joiner connect units for continuous row or wire through, see CHJ on page 93. Optional plug-in wiring system described in detail on page 92.

Slimline and High Output Channels are ideal for maximum illumination in retail stores and commercial environments. Available in 4', 6', and 8' individual lengths as well as continuous row mounting.

Housing

High-gloss, baked white enamel finish on steel housing with removable wireway access panel. Fixture is shipped fully wired and assembled. CHX models have patented (#4,422,132) flip-up socket bar and turn fastener for attaching wireway cover.

Options

Options include modular wiring, plug-in systems and wire guards.

Electrical

Fully wired for 120V, 60Hz operation with thermally protected, automatic resetting, Class P, high-power-factor ballast, unless otherwise specified. UL listed, damp location.

Mounting

Combination end plate/joiner connects units for continuous row or wire through. Heavy duty joiner plate available. Surface or pendant mount, high output model must be suspended at least 6" from ceiling for cooler operation.

CHA - Two or three lamps
mounted at 90°
24", 36", 48"

CHA and CHS Striplites are ideal for custom lighting in retail stores and commercial environments.

Dimensions

Housing

Die-formed heavy gauge steel with high-gloss, baked white enamel finish over rust inhibiting phosphate coat with removable wireway access panel. Fixture is shipped fully wired. Secure wireway cover with screw. Ample knockouts provided.

Options

Options include modular wiring and master unit ballast driving multiple fixtures, e.g., CHS232 B11 4L-M will drive the second fixture CHS232-S (less ballast). Optional plug-in wiring system described in detail on page 92.

Electrical

Fully wired for UNV 120-277V, 50-60Hz operation with thermally protected, automatic resetting Class P, sound rated A ballast as standard unless otherwise specified. UL listed damp location.

Mounting

Individual or continuous row.

Options

CORD AND PLUG

CPT(x)

1 = 120V

2 = 277V

CP3 = Cord & Plug - 120V Straight Blade 5-15P

PLUG-IN CONNECTORS

Ballast wired to Black:

PL1 - one circuit, two wires

PL2 BK - two circuits, three wires

Ballast wired to Red:

PL2 RD - two circuits, three wires

FB = Fast blow fuse

SB = Slow blow fuse

Housing

Die formed heavy gauge steel chemically treated to ensure superior adhesion of post production applied high reflectance powder coating.

Electrical

Fully wired for electronic T5, UNV 120-277V, 50-60Hz operation with thermally protected, automatic resetting Class P, sound rated A ballast as standard unless otherwise specified. UL listed.

Mounting

Ceiling or surface mount. 3/8" feed connector is included for use with steel flex conduit. Not recommended for through wiring.

Introducing the new **LP5 and LS5** series, a revolutionary Low Profile line of Single lamp T5 open strips. LP5 is an open strip with a distinctly low profile (7/8") and even with lamp is a mere 1 5/8" high. The width is a slim 1 1/4" making the LP5 the thinnest and lowest profile strip on the market. Perfect for accent and task lighting. Both also include exclusive tabbed lamp holders for ease of changing lamps and assurance that the lamp is properly seated in the socket.

LP5 Low Profile Ordering Information

Series	# Lamps	Lamps	Ballast	Voltage
LP5	1	<i>Preheat</i> 06 = F6T5 (9") 120V Only 08 = F8T5 (12") 120V Only <i>Standard</i> 14 = F14T5 (22") 21 = F21T5 (34") 28 = F28T5 (46") <i>HO</i> 24H = F24T5HO (22") 39H = F39T5HO (34") 54H = F54T5HO (46")	E = Electronic	U1 = 120-277V 120 = 120V

 128 / 154H models: X=45.984"

LP5 Standard Mount

LS5 Side Mount

WS Series Slim Striplite and remote ballast box fixture are ideal for tight areas requiring multiple fixtures.

Dimensions

Housing

Die-formed heavy gauge steel with high-gloss, baked white enamel finish over rust inhibiting phosphate coat. Removable front panel allows access for wiring with snap-in conduit fittings on site. Quick assembly to back panel with screws provided. Embossed mounting holes through fixture speed up mounting to surface and allow remote assembly, if required. Striplite is shipped separate from remote ballast box and flex assemblies.

Electrical

Ballast and flex prepared as specified. Fully wired for UNV 120-277V, 50-60Hz operation with thermally protected, automatic resetting Class P, sound rated A ballast as standard unless otherwise specified. UL listed.

Mounting and Ballast Box

One 18" ballast box can comfortably handle up to 4 striplites, utilizing the four standard knockouts. Ballast box access cover is held in place with tab and quarter-turn fastener.

WS Series Slim Striplite Ordering Information

Series	Lamp
WS = Single lamp Slim Channel, one conduit hole	117 = 17W T8 (26" fixture length)

STC Staggered Striplites are ideal for custom lighting in retail stores and commercial environments. Striplites are available in 2', 3', 4', and 8' Tandem as well as continuous row mounting.

Housing

Die-formed heavy gauge steel with high-gloss, baked white enamel finish over rust inhibiting phosphate coat with removable wireway access panel. Fixture is shipped fully wired. Secure wireway cover with screw. KOs provided.

Options

Optional plug-in wiring system described in detail on page 92.

Electrical

Fully wired for UNV 120-277V, 50-60Hz operation with thermally protected, automatic resetting Class P, sound rated A ballast as standard unless otherwise specified. UL listed damp location.

Mounting

Individual or continuous row. STC features staggered ends to eliminate shadows at overlap.

*CEE listed T8; specify (L)ow, (N)ormal, or (H)igh ballast factor. Contact factory for NEMA Premium.

Housing:

Die formed heavy gauge steel with high gloss powder coat finish. Removable wire-way access panel. Knockouts provided on ends and back for through or direct wiring. Lamp holders are "Tab" type for ease of relamping and to assure lamp is properly seated in the sockets.

Electrical:

ST5 fixtures are electronic T5, 120-277V 50-60Hz and are UL/cUL listed.

Mounting:

ST5 can be directly mounted in a cove or undercabinet in continuous rows.

The ST5 is a low profile staggered strip for T5 and T5HO lamps. The ST5 series is specifically designed to fit into small areas and coves, and with an overlap of up to 4", provides smooth and attractive illumination. It can be used in conjunction with the SA5 to assure that cove lighting reaches the entire length of the run.

ST5 Ordering Information

Series	Size	# Lamps	Lamp Type
ST5	2 = 2' nominal length 26" overall length	2	14 = 14 watt T5 (2' unit)
	3 = 3' nominal length 38" overall length		21 = 21 watt T5 (3' unit)
	4 = 4' nominal length 50" overall length		28 = 28 watt T5 (4' unit)
			54H = 54 watt T5HO (4' unit)

Ballast	Voltage
E = Electronic	U1 = 120-277V

Dimensions

2' Model

The SA5 is a low profile adjustable staggered strip for T5 and T5HO lamps. The SA5 series is specifically designed to fit into small areas and coves and compliments the ST5 series overlap that can be field adjusted to end a run or can be extended to 1 ½ times its closed length to reduce fixtures required to light a cove with smooth and attractive illumination. The SA5 can also be used as a two lamp T5 strip.

Housing:

Die formed heavy gauge steel with high gloss powder coat finish. Removable wire-way access panel. Knockouts provided on ends and back for through or direct wiring. Lamp holders are "Tab" type for ease of relamping and to assure lamp is properly seated in the sockets.

Electrical:

SA5 fixtures are electronic T5, 120-277V 50-60Hz and are UL/cUL listed.

Mounting:

SA5 can be directly mounted in a cove or undercabinet in continuous rows.

SA5 Ordering Information

Series	Size	# Lamps	Lamp Type
SA5	2 = 2' nominal length adjusts to 30" 3 = 3' nominal length adjusts to 50" 4 = 4' nominal length adjusts to 65"	2	14 = 14 watt T5 (2' unit) 21 = 21 watt T5 (3' unit) 28 = 28 watt T5 (4' unit) 54H = 54 watt T5HO (4' unit)

Ballast	Voltage
E = Electronic	U1 = 120-277V

Dimensions

3' Model

SA52 Models: X = 22 ¾" - 31" Y = 0" - 8 ⅝"
SA53 Models: X = 34 ¼" - 49" Y = 0" - 14 ¾"
SA54 Models: X = 46" - 66" Y = 0" - 20"

Housing

Heavy gauge steel with high-gloss baked "safety" yellow enamel finish over rust inhibiting phosphate coat. Single strut (SKDL) mounting arm units are equipped with a folding knuckle joint allowing for horizontal and vertical adjustment. Double strut (SKDDL) mounting arm units provide greater strength and durability. All units supplied with lightweight, corrosion resistant polycarbonate lamp head.

Electrical

6' 120V 18-3 cord, plug, and rocker switch supplied. UL listed.

Mounting

Horizontal mount. Two piece wall mounting bracket provided.

The docklight series uses polycarbonate heads for resistance to dents, breaks, bends and stays cool to the touch. Double strut arms (SKDDL) on the HID model provides sturdy, durable construction. High pressure sodium option is available for long lamp life and lower starting temperature.

SKDL and SKDDL Series Ordering Information

Series	Lamp	Arm Length*	Lamp Head
SKDL = Single strut SKDDL = Double strut	HPS = 50W High pressure sodium (Leave blank for R40 or PAR38 150W max)	40 = 40" 60 = 60"	P = Polycarbonate

*For 24" or 90" arm lengths contact factory.

Accessories

SKWG8P = Stainless steel wireguard to protect lamp. Mounts easily to holes provided in polycarbonate lamp head.

SKDLFAN* - Fan

Replacement Lamp Heads

SKINC-HEAD = For incandescent models

SKHPS-HEAD = For high pressure sodium models

*Available with SKDDL, double strut only. Lamp provided.
