CONSTRUCTION

Southwire Type SOOW Flexible Cords are manufactured using bare flexible stranded Class M or Class K copper conductors, and heat, moisture and oil resistant EPDM rubber insulation. The insulated conductors are cabled with rubber fillers, with a full cotton serve or paper separator wrapped around the assembly for improved tensile strength. A heat, moisture and oil resistant flexible CPE jacket is extruded over the assembly to complete the construction. Sizes 18 through 10 AWG fully annealed stranded bare copper per ASTM B-174. Some sizes may be subject to minimum order quantity.
