# Grounding Busbar – EGBA14215JJ

Proper bonding is essential to create an equipotential plane between service grounds and equipment during fault and transient conditions. This equipotential plane provides a near-zero voltage differential, and serves to protect people and equipment during these events. The grounding busbar is the most popular bonding product in use today.

- Provides a convenient, single-point grounding and bonding location
- Conductors are welded to the bar using a ERICO CADWELD exothermic connection or are mechanically fastened by using lugs
- Custom bars can be designed and manufacturerd to customer specifications

Part Number	EGBA14215JJ
Material	Copper
Busbar Configuration	Busbar, Insulators and Brackets
Hole Pattern	JJ
Mounting Hole Size	0.438"
Length	15"
Width	2"
Thickness	1/4"
Tin Plating	No
Pigtail Included	No
Certifications	cULus
Standard Packaging Quantity	1 pc
UPC	78285644528
EAN-13	8711893097528

Diagrams are representative of the hole pattern. The number of holes is dependent on the length of the grounding busbar.

Additional configurations are available by special order. Note special orders may incur additional lead time.
